

Job Objective: iOS Development

education experience

Graduation Institution: Hangzhou Dianzi University Graduation date: 2017

Major: Electronic Science and Technology

Education: Bachelor's Degree

professional skill

- 8+ years of iOS Development experience; proficient in Objective-C, Swift, UIKit and Auto Layout.
- Experienced in Performance Optimization and Debugging for large projects (app size, speed, crashes).
- Solid knowledge of Mobile Application Architecture and design patterns (MVVM, MVP).
- Skilled in multithreading, Combine and SwiftUI for modern iOS development.
- Familiar with Unit Testing to ensure code quality.
- Experienced in componentization and private library development.
- Proficient in using Instruments, Charles, Wireshark for analysis.
- Experienced in RESTful API, JSON and network protocols (HTTPS, MQTT).
- Skilled in Core Data and secure data encryption (Secure Enclave).
- Proficient in Git and basic CI/CD for version control.
- Able to independently complete the full App Store Submission process.
- FinTech experience with top financial apps (e.g. Tonghuashun).

work experience

2022 - Present Changan Automobile (Changan Automobile APP has 2 million daily active users.)

Core Responsibility: Vehicle control module development & optimization.

Led key projects: Private library construction, SDK componentization, micro-app development and homepage revision, upgrading technical architecture and user experience.

Improved core indicators: Reduced SDK crash rate to <0.03%, boosted homepage loading performance by 50%, and compressed package size from 800MB to 400MB.

Solved key issues: Resolved SDK-integrator component conflicts, cutting development/maintenance labor costs by 30%.

2021 - 2022 ByteDance (DongCheDi APP with 10 million daily active users)

Core Responsibility: Maintenance & optimization of Dianchei B-end dealer system.

Promoted architecture splitting: Designed component boundaries, split monolithic project into 8 independent components, enabling multi-team parallel development and shortening delivery cycle by 30%.

Enhanced stability: Fixed top 10 online intractable crashes, reducing system crash rate by 0.1%.

2019 - 2021 Tencent Music (KuGou Music APP with 80 million daily active users)

Core Responsibility: Development & optimization of friend recommendation module (tens of millions of DAUs).

Core function development & maintenance: Developed and maintained contact/WeChat/QQ integration functions to ensure stable operation under high traffic.

Drove project delivery: Coordinated cross-team schedules to ensure on-time launches; reconstructed module with MVVM, improving page loading speed by 60%.

Work performance recognition: Achieved A-level performance in 2020 for outstanding results.

2017 - 2018 TongHuaShun (TongHuaShun APP has 35 million daily active users.)

Core Responsibility: Sunwin Hongyuan securities APP core development & trading business maintenance.

Built key modules: (error logging, Getui push, user behavior analysis), improving crash location speed by 30%.

Completed post-merger version compatibility: maintained core trading functions, supporting millions of concurrent users with zero major failures.

self-assessment

- 1) **Technical Capabilities:** 8 years of iOS development experience, with a proactive learning attitude. I write clean, high-performance and scalable code, and specialize in building highly stable apps with elegant exception fault tolerance.
- 2) **Problem-solving & Pressure Resistance:** Strong ability to work under high pressure. For complex technical issues like component conflicts and online tough crashes, I can quickly locate root causes, deliver feasible solutions and drive efficient project delivery.
- 3) **Teamwork & Lifestyle:** Focus on team building, willing to share technical experience and promote internal communication to enhance team performance. I love cycling, table tennis and singing; sports help me stay energetic and efficient at work, and I also use shared interests to strengthen team connection and harmonious collaboration.
